

Please do not take away local weather and traffic information from XM satellite radio! This service is a very valuable one that we as "subscribers" pay for. Satellite radio has been a great improvement to the consumer who may be looking for something else that free radio does not offer. Keep in mind when considering petition 04-160 that those who are paying their monthly fees and who buy the satellite radios also want the local benefits of weather and traffic. Thank you for your time and consideration.
